Q-Versus

Nata nei laboratori la proetc q-versus rappresenta la nuova generazione di protezione orbitale. Interamente progettata con l'utilizzo di software 3D e validata con analisi FEM è stata poi realizzata e testata con attrezzature di collaudo appositamente studiate e dotate di sistemi di acquisizione dati in grado di monitorare innumerevoli parametri in tempo reale.

Developed in the laboratories from LA Protec, Q-Versus represents the new generation of orbital covers. This cover has been entirely planned with the use of 3D software and validated on analysis FEM. Furthermore, this cover has been REALIZED and tested with final testing equipment which was EXPRESSLY developed and equipped with systems specified to monitor numerous parameters in real time.

Q-VERSUS: LA NUOVA GENERAZIONE DI COPERTURE ORBITALI

Q-VERSUS: THE NEW GENERATION OF ORBITAL COVERS

50m/min

Paracolpi integrati per velocità fino a 50 m/min.

Integrated buffer for speed up to 50m/min.

3.000.000

Testata nei nostri laboratori per 3.000.000 di spostamenti.

Gone through tests in our Research and Development department about 3.000.000 strokes.

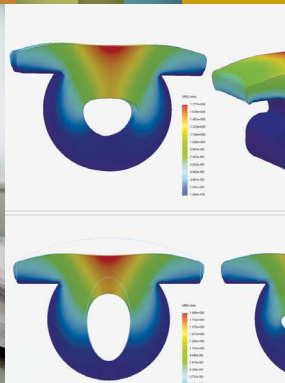

-50%

Ingombri ridotti grazie alle guide integrate negli elementi.

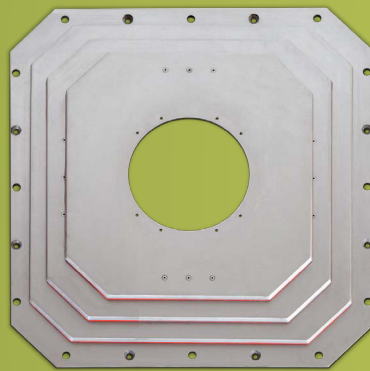

Reduced dimensions thanks to the guides worked into the elements internally.
