

ARMA-D

armored belt with overlapping links

* THE PICS REFERS TO 10.000 WORKING HOURS OF THE BELT

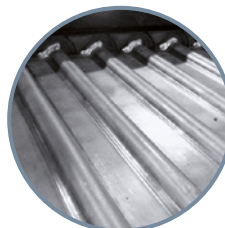

Arma-D

armored belt with overlapping links

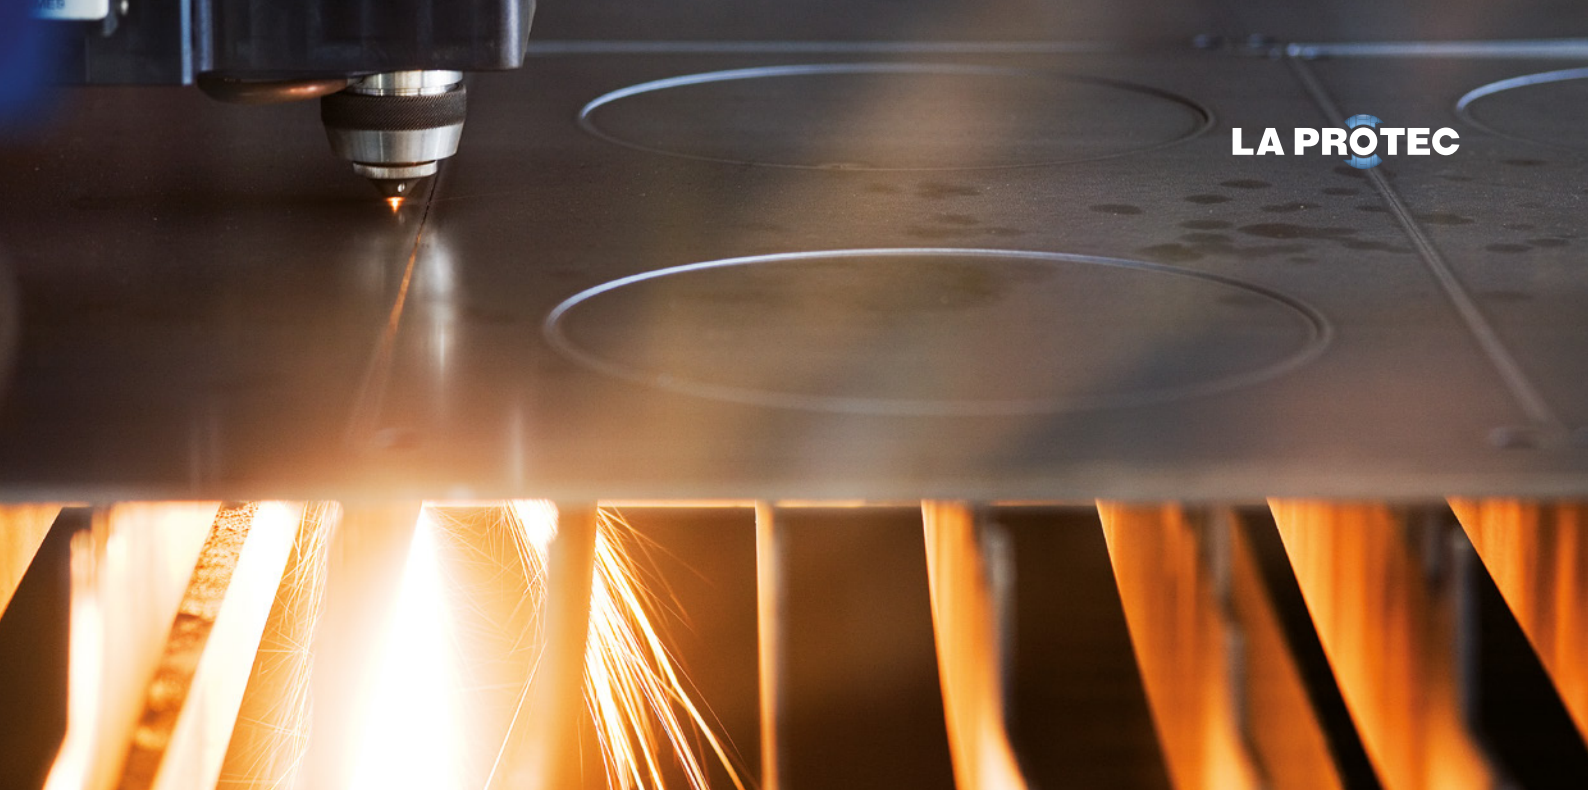

Belt designed for convey pieces and abrasive dust.

Use:

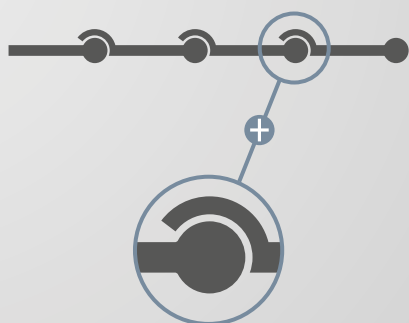

- Laser and Plasma cutting machines
- Presse
- Working Center for Dry processing

P50
pat pending
armored belt with
overlapping links

TECHNICAL CHARACTERISTICS

Pitch 50

Unique pitch 50 at overlapping links available on the marker. This shape prevents the passage of abrasive dust, that cause the fast usury of pins and links on standard-hinge belts.

Thickness 3 mm

The continuous link guarantees a more than doubled carrying capacity than a standard hinge belt.

Continuous fins

Special profile minimizes the passage of dust and doesn't supply footholds for scraps and chips.
